LIST OF ANNEXES

Annexure- I: Resettlement Budget of Siri Toi Dam Subproject

Annexure- II: A Sample of Undertaking and Evidence of Land Ownership to Install Solar Powered Drip Irrigation System by the Farmers of Zhob Project Area

Annexure- III: Updated GAP Progress

Annexure- IV: Screening form to Select Women for Livestock Provision

Annexure- V: Undertaking by the Women Applicants for Livestock Provision

Annexure- VI: Meetings/Consultation Photographs of Women

Annexure- VII: ADB,s Checklist of Involuntary Resettlement

Annexure- VIII: ADB,s Check List of Indigenous Peoples (IPS)

1 PROJECT DESCRIPTION

1.1 GENERAL

- Water is a critical resource for sustainable economic development of Balochistan. The Government of Balochistan (GoB) formulated Integrated Water Resources Management (IWRM) Policy to improve efficiency of surface and ground water and the Project supports in implementation of the Policy. The Policy provides a comprehensive framework for the province to address the issues of water management and development in the context of basin approach, with water harvesting, and groundwater recharging as an integral part of watershed management. About 11 potential subprojects out of over 300 long lists in the Zhob and Mula river basins were selected for potential Asian Development Bank (ADB) financing based on a set of criteria such as water and land availability, economic viability, and a balanced approach to extending development support to different tribal groups. The proposed project will construct and improve irrigation land of about 17,592 hectares (ha), and benefit about 42,900 farmers in the Balochistan province.

1.2 PROJECT OBJECTIVE

- The project of Balochistan Water Resources Development Sector Project (BWRDSP) is to increase agricultural production in the project area by: (1) improving and constructing irrigation infrastructure, (2) developing command area and establishing and/or rehabilitating watershed protection and (3) strengthening institutional capacity.

1.3 PROJECT SCOPE

- The project consists of 11 subprojects; 5 in Zhob and 6 in Mula river basins. The subprojects relate to improvement in irrigation system and construction of Siri Toi Dam in Zhob basin. The list of 11 subprojects with the current status is as below in Table 1:

Table 1: Proposed Subprojects and Current Status

Sr.	Name of Subproject	Type of Document to be Prepared	Current Status of the Subproject
Zhob River Basin (ZRB)			
1	Siri Toi Dam	LARP	Prepared LARP. Construction is in progress
2	Killi Sardar Akhter PIS	DDR	Prepared SDDR
3	Farmers Managed PIS/FIS Schemes	DDR	delay
4	Ahmadzai PIS+FIS	DDR	Prepared SDDR, construction in progress
5	Sabakzai Dam Command Area Rehabilitation Works	DDR	delay
Mula River Basin (MRB)			
1	Churri Infiltration Gallery	DDR	Preparation of SDDR is in progress
2	Karkh Valley Dev. Scheme	DDR	Prepared SDDR, construction is in progress
3	Manyalo, Raiko & Rind PIS	DDR	SDDR is in progress
4	Kharzan-Hatachi Infiltration Gallery	DDR	Prepared SDDR, construction is in progress
5	Pashta Khan & Grambowad PIS	DDR	Prepared SDDR
6	Farmers Managed PIS/FIS Scheme Improvement	DDR	delay

4. The subprojects of Zhob basin are: Ahmedzai PIS + FIS; Killi Sardar Akhter PIS; Sabakzai Command Area Development; Farmers managed PIS/FIS Scheme Improvement and Siri Toi Dam. The Zhob basin projects will bring 4207 ha new area under irrigation from Siri Toi Dam and will improve irrigation system for 4091 ha area. Ground water recharge of 4091 ha and Khushkaba farming of 561 ha will be additional benefits of Zhob basin subprojects implementation.
5. The subprojects of Mula basin relates to improvement in irrigation system which are: Churri Infiltration Gallery; Kharzan-Hatachi Infiltration Gallery; Pashta Khan & Grambowad PIS; Karkh Valley Development; Manyalo, Raiko & Rind Ali PIS; and Farmers Managed PIS/FIS Scheme Improvement. The project will bring 1782 ha new area under irrigation and will improve irrigation system for 5673 ha area of Mula river basin. It will further improve 1278 ha under Khushkaba farming and will recharge ground water of 321 ha.

1.4 PROJECT OUTPUTS

1.4.1 Output-1

6. Irrigation infrastructure and watershed protection constructed and/or rehabilitated. The output will construct, upgrade, or rehabilitate (i) Siri Toi Dam with storage of 30 Million Cubic Meter (MCM), including a spillway and a water intake; (ii) weirs and infiltration galleries; (iii) about 276 kilometers of irrigation network, including head works, offtakes, sluice gates, other associated structures, and livestock drinking facilities; (iv) infrastructure to reduce flood risks to irrigation canals and the command area; and (v) facilities to increase women's access to water for domestic use, such as washing pads and water collection points. It will also support watershed protection for about 4,145 ha, including through (i) the rehabilitation of trees and grasses in forests; and (ii) land and water conservation activities, such as check dams, water harvesting structures, and small storage ponds for plantation and/or groundwater recharge.

1.4.2 Output-2

7. Command area established and/or improved. This output will support the development of about 16,592 ha of command area, including 1,839 ha for khushkaba (rainwater harvesting) farming. It will involve the (i) construction and rehabilitation of secondary and tertiary canals; (ii) construction of lined watercourses; (iii) improvement of on-farm water management and agronomic techniques, such as land leveling and irrigation scheduling; (iv) construction of a kacha (desert) track and access roads; (v) construction of rainwater harvesting and storage facilities; (vi) provision of farm machinery; and (vii) provision of training on sustainable farming.
8. The output will support: the pilot testing of about 130 ha of high-value agriculture in the project area; installation of about 160 cost-effective solar-powered drip irrigation systems; the construction of two olive oil extraction plants; two processing plants for fruits and vegetables; and the construction of at least 22 women-led small-scale income-generating agribusinesses for livestock. It will strengthen high-value farming technology and increase agricultural production by demonstrating technology on at least 130 ha in 160 high-value fruit and vegetable farms and by developing guidelines on the efficient use of water and agriculture inputs. It will also (i) develop community capacity for high-value agriculture, (ii) create awareness programs on safe drinking water practices and food nutrition for women and girls, and (iii) provide about 250 women and girls with training in kitchen gardening skills.

1.4.3 Output-3

9. Institutional capacity strengthened. This output will support the (i) provision of consulting services for detailed engineering design, construction supervision, and implementation support; (ii) provision of training for the executing and implementing agencies on project management, financial management, procurement, disbursement, gender, and social and environmental safeguards; (iii) procurement of hydro-meteorological equipment to strengthen information collection and water use monitoring; and (iv) development of infrastructure for improved project management and training.

1.5 REPORTING PERIOD

10. This semiannual social safeguard monitoring report is for the period of July to December 2023.

1.6 PROGRESS DURING THE REPORTING PERIOD

11. During the period following progress was achieved:
- Conducted Public Consultations with the DPs in the project area; and
 - Submitted final Updated LARP for Settled land of Siri Toi dam subproject.
 - Conducted community meetings with the farmers for installation of solar powered drip irrigation system/tubewells in both river basins, MRB and ZRB.
 - Prepared Social Due Diligence Report (SDDR) of Solar Powered Drip Irrigation System in Mula River Basin (MRB), Khuzdar.
 - Prepared Social Due Diligence Report (SDDR) of Solar Powered Drip Irrigation System in Zhob River Basin (ZRB), Zhob.
 - For GAP component, conducted women consultation meetings to generate income through livestock provision in both river basins, MRB and ZRB.
 - Prepared Social Due Diligence Report (SDDR) for “Livelihood and Income Generation Through Distribution of Goats/Sheep” for poor/vulnerable women of MRB area, Khuzdar District.
 - Prepared Social Due Diligence Report (SDDR) for “Livelihood and Income Generation Through Distribution of Goats/Sheep” for poor/vulnerable women of ZRB area, Zhob District.

2 MONITORING OBJECTIVES AND METHODOLOGY

2.1 OBJECTIVE OF THE SEMI-ANNUAL MONITORING REPORT

12. The project planning documents laid obligation of semiannual social safeguard monitoring of the project to ascertain the implementation progress through review of progress documents and monitoring of safeguard implementation activities in project execution. It includes review and verification for effective implementation of social safeguard plans and assess whether envisaged objectives of enhancing, or at least restoring the livelihoods of all DPs is achieved in real terms.

2.2 MONITORING INDICATORS

13. During the reporting period, Specific monitoring were based on the following output:
- a) Monitoring of social concerns on ongoing construction activities of Killi Ahmad Zai Subproject of Zhob River Basin (ZRB), Zhob.
 - b) Monitoring of social concerns on ongoing construction activities of Karkh Valley Development and Kharzan-Hatachi subprojects of Mula River Basin (MRB), Khuzdar.
 - c) Progress on GAP component including livelihood and income generation through distribution of livestock to the poor and vulnerable women of MRB and ZRB.
 - d) Progress on installation of Solar powered drip irrigation system in MRB and ZRB.
 - e) Progress on Section notifications of Siri Toi Dam Subproject; and
 - f) Conducted Field Survey of Churri Infiltration Gallery Subproject, MRB, Khuzdar for the Preparation of SDDR.

2.3 MONITORING METHODOLOGY

14. This semi -annual social monitoring report is based on review of, i) Detail Design of the subprojects, ii) Safeguard reports (LARP/ SDDRs), iii) record on consultations with DPs including GAP and other community consultations; iv) updates on grievance redress mechanism including complaints recording and v) census of DPs and socio-economic profile of the area.

3 LAND ACQUISITION AND RESETTLEMENT ACTION PLAN OF SIRI TOI DAM SUBPROJECT-ZRB

15. Internal Monitoring Report (IMR) of the unsettled land under the Siri Toi Dam Subproject was submitted during March 2022. External Monitor (EM) visited the site and submitted External Monitoring Report (EMR) on unsettled land of Siri Toi Dam.
16. Draft LARP of Siri Toi Dam was prepared after verification of land records, noting structures and activities of Displaced Persons (DPs) on 16th December 2021. The LARP was improved by incorporation of ADB comments and necessary information, and it was approved by ADB. LARP is being implemented and unit costs (land, structures and trees) was approved and accordingly LARP budget Rs.83.89 million was prepared/ approved by DAPC. LARP budget is provided in **Annexure-1**, it is taken from Table 9.3 of prepared LARP document.
17. The Final LARP of Siri Toi Dam including land value assessment by the DPAC was submitted to the Client in August 2022 for onward submission to the ADB. The ADB comments on flat rate of land to be acquired was addressed in December 2022 and re-submitted to the ADB in December 2022.
18. Section 7 was notified by the revenue department in November 2022. Now waiting for the notification of Section 11 for the payment of land compensation to the DPs.
19. Construction activities on unsettled land (Govt.) have been started in December 2022 on spillway and spillway channel.

20. The main features of the findings are provided below:

3.1 SCOPE OF LAND ACQUISITION

21. For the construction of dam reservoir and its related structures, two main canals, 10 distributaries and 03 minors of various width and length, 442 hectares (1093 acres) including 35 hectares (88 acres) settled land and 407 hectares (1005 acres) unsettled land will be acquired. The Right of Way (RoW) of the proposed channels varies significantly due to hilly, terrain, rocks and topographic variation. The land falls in Tehsil and District Zhob, Balochistan.

3.2 SUBPROJECT STAKEHOLDERS

22. Three major categories of project stakeholders were identified for the Siri Toi Dam Subproject (i) government institutions who are involved in the management of the Project (ii) DPs who are the landowners and (iii) the communities residing along the right and left irrigation system.

3.3 IMPACT ON LAND

23. Based on the detailed design, total 1093 acres of land will be acquired for the sub-project. Out of which 727.30 acres will be acquired for the Siri Toi Dam, 135 acres will be acquired for the Right Bank Irrigation System and 230.50 will be acquired for the Left Bank Irrigation System. In total, 365.50 acres of land will be acquired for the both left and right bank irrigation systems.

3.4 LAND OWNERSHIP

24. Out of total 1093 acres land to be acquired, 88 acres is the settled land (privately owned) and remaining 1005 acres is the unsettled land (government owned) and considered as public land. Out of total 88 acres settled land, 07 acres located in dam area and remaining 81 acres falls in the left bank irrigation system. Out of total 1005 acres unsettled land, 720.30 acres falls in dam area, 149.50 acres falls in the left bank irrigation system and remaining 135 acres falls in the right bank irrigation system.

3.5 IMPACT ON LAND AND AFFECTED POPULATION

25. The land to be acquired (88 acres privately owned) is un-productive & barren and currently there is no economic activity on this land except 1 DP who will lose , animal shed and immature fruit tree in dam area. Due to the total 88 acres affected settled land; 129 number of DPs will be losing their barren land as detailed in **Table 2**. Out of which, 16 number will be displaced due to the settled land falling in the dam area and 113 number will be affected due to the settled land falling in the left bank irrigation system.

Table 2: Summary of the Affected Settled Land and DPs (Project Components)

Sr. No	Project Component	Name of Killi	Settled Land (acres)	No. of DPs	DP Losing Structures, Trees and Land	Total DPs
1	Dam Area	Landi	07	15	01	16
2	Left Bank Irrigation System	Ahmed Khel	81	113	0	113
3	Right Bank Irrigation System	Nil	0	0	0	0
Total			88	128	01	129

3.6 SOCIO-ECONOMIC PROFILE:

26. The land under acquisition belonged to 4 killies names i) Killi Ahmad Khel (Killi Hazrat Sahib), ii) Killi Landi, iii) Killi Karigran and iv) killi Gaddai khel. Except Killi Ahmad Khel, other three killies are located out of project area. People left the area, houses broken and moved to other killies/area for their earning. There are 129 DPs whose monthly income varies; very low income below Rs.20,000 of 9.47%, medium income Rs.20,000 to 40,000 of 63.16% and decent income above Rs.40,000 of 27.37%.

3.7 SUBPROJECT IMPACT ON LIVELIHOODS

27. Generally, it was also observed by the team that project will have positive impacts overall on their socio-economic situation which is at present in degradation condition. The communities have strong feelings of positive effects of Siri Toi Dam Subproject. Because their land holdings are barren due to non-availability of water. With the availability of irrigation water, their land will become under cultivation resulting green revolution in the area. The Project will play a pivotal role to reduce poverty significantly in the area. With the increase of income, education of the community will be increase. There will be development of structure, communication, roads and living standard as well.

3.8 Other findings:

- No settlement or amenities in ROW area.
- No public structure/fixture is under project impact.
- No indigenous peoples found in the area.

3.9 GRIEVANCE REDRESSAL MECHANISM (GRM):

28. Grievance Redress Mechanism has been approved for the project which constitutes 3 tiers of Grievance Redressal Committees (GRC). 1st tier Displaced Persons-GRC structured for each subproject area and each DP-GRC comprised of 4 members. 2nd tier Basin Level-GRC for each basin comprised 6 members headed by DPD of each basin. 3rd tier Project Level-GRC of 5 members is headed by PD. The GRCs will receive the complaints and facilitate the resolution of affected persons' concerns and grievances. GRM explains how the procedures are accessible to DPs of the project.
29. Project social team visited the area, explained the objectives of formation of Grievances Redressal Committees (GRCs). The team asked the community to select the members of GRCs, who are not controversial, acceptable to all, have spare time to participate in the meetings, accommodative in nature and skill to unite other peoples at one point.
30. The GRCs were formed for MRB and ZRB area as detailed in following sections. Up-till now no grievance/ issue was raised by the DPs so no GRC meeting was needed/ held to resolve the issue. Complaints registered are placed in the project site offices for documentation of complaints. Since there is no complaint received till now therefore, the local people have no grievances related to the project activities.

3.9.1 Formation of Grievance Redress Committee (GRC)

31. With reference to the PMO letter No. PD/BWRDSP/2020/1028-1040 Quetta, the 30th December, 2020 regarding constitution of Grievances Redressal Committee at 1st tier.

**5th SEMI-ANNUAL SOCIAL SAFEGUARDS INTERNAL MONITORING REPORT
(JULY-DECEMBER 2022)**

The consultants and PIO staff have conducted meetings with DP and mutually organized GRCs.

3.9.2 GRCs of MRB Area:

32. The Consultants Social Team of BWRDSP conducted meetings in the field from 29-5-2021 to 31-5-2021 to form GRC at Village-Level of Karkh Valley Development Subproject, Kharzan- Hatachi Subproject and Manyalo, Raiko & Rind Subproject of Mula River Basin (MRB) District Khuzdar to resolve the issues of local community fall in the subproject area. The project interventions did not impact any private land and assets (structures/fixtures etc.), so no need to form Displaced Person Committee (DPC). However, GRC at Village-Level was formed to safeguard locals. The names of GRC members of MRB subprojects are given in **Table 3**.

Table 3: GRCs Formed at Village-Level in MRB Project Area

3.9.3 GRCs of ZRB Project Area:

33. The Consultant's Social Team, BWRDSP conducted meetings in the field areas to form GRC at Village-Level for Ahmadzai PIS/ FIS and Killi Sardar Akhtar Subprojects of

**5th SEMI-ANNUAL SOCIAL SAFEGUARDS INTERNAL MONITORING REPORT
(JULY-DECEMBER 2022)**

District Zhob to resolve the issues of local community fall in the subproject area. The project interventions did not impact any private land and assets (structures/fixtures etc.), so no need to form DPC. However, GRC at Village-Level was formed to safeguard locals. The names of GRC members of ZRB subprojects are given in **Table 4**.

Table 4: GRCs Formed at Village-Level in ZRB Project Area

4 PREPARATION OF SOCIAL DUE DILIGENCE REPORTS (SDDRS)

34. **SDDRs of 5 subprojects:** Ahmadzai PIS+FIS, Karkh Valley Development Scheme, Killi Sardar Akhtar PIS, Kharzan-Hatachi Infiltration Gallery and Pashta Khan & Garambowad PIS were prepared and submitted to the ADB. ADB commented on Kharzan-Hatachi and Killi Sardar Akhtar SDDRs for confirmation of ROW from irrigation department. Kharzan-Hatachi certificates of 05 subprojects were received from irrigation department and submitted.
35. Private land of 7.2 acres come under ROW of Killi Sardar Akhtar subproject. Therefore undertaking on affidavite was taking from concerned land owners and accordingly the SDDR was revised and certificate from irrigation department is awaiting.
36. As the resources are available, the Socio-Economic and Gender survey was conducted to complete the SDDR. (SDDRs based on the design of structures without verification of land ownership from the revenue departments, field verifications and impact assessment).

4.1 SDDRS FOR SOLAR POWERED DRIP IRRIGATION SYSTEM FOR MRB & ZRB AREA

37. The due diligence of installation of solar powered drip irrigation system the subprojects MRB was conducted. The installation of solar powered drip irrigation systems includes 160 pilot sites under Japan Fund for Poverty Reduction (JFPR) grant for high value agriculture in the project area. Out of the total 160 sites 80 fall in Mula River Basin District Khuzdar and 80 in Zhob area.
38. The SDDR of MRB area was prepared and submitted for the installation of Solar Powered Drip Irrigation Systems for 60 pilot sites under Japan Fund for Poverty Reduction (JFPR) grant for high value agriculture in the Mula River Basin project area District Khuzdar.

**5th SEMI-ANNUAL SOCIAL SAFEGUARDS INTERNAL MONITORING REPORT
(JULY-DECEMBER 2022)**

39. Similarly, during the reporting period of October 2022, after conducting consultation meetings with the approved applicants by the PIO and Agriculture department, the SDDR for Solar Powered Drip Irrigation System of Zhob River Basin (ZRB) was prepared. The SDDR was prepared and submitted in October 2022 for the installation of Solar Powered Drip Irrigation Systems for 46 pilot sites under Japan Fund for Poverty Reduction (JFPR) grant for high value agriculture in the Zhob River Basin project area, District Zhob. The list of beneficiaries is being provided in Table 5 & 6. A samples of selection criteria for solar powered drip irrigation schemes and undertaking from farmer and proof of land ownership from revenue record is attached as **Annexure-2**, While photographs are provided in **Annexure 6**.

4.2 IMPLEMENTATION OF GENDER ACTION PLAN (GAP)

40. On this Project, the GAP carries much importance as Output 1 & 2, there are number of targets to be achieved during the project period. To achieve these targets, there are line departments like Agriculture/Horticulture, Forest, OFWM and Livestock.

5th SEMI-ANNUAL SOCIAL SAFEGUARDS INTERNAL MONITORING REPORT (JULY-DECEMBER 2022)

41. The Consultants with the close coordination and support of PIO, worked in the both river basins and conducted 23 consultation meetings with males and females of 06 subprojects fall in Mula River Basin (MRB) Khuzdar and Zhob River Basin (ZRB) Zhob from August 2020 to August 2021 and achieved remarkable progress regarding needs assessment. The needs assessment was submitted to the Client on monthly and quarterly basis. Besides, meetings were conducted with all concerned departments through PIO. Detailed discussions were held and the Consultants updated them about the GAP target and how these targets can be achieved. But after a long awaiting and requesting to the PIO and the concerned agencies through PMO, initiatives could not start even over a long period of time and still there is dismal performance on GAP due to managerial and non-cooperation of the concerned departments.
42. A joint meeting on GAP was held on March 10, 2020 among PMO, ADB Manila and ADB Pakistan representatives. A meeting was held on progress of GAP on February 9 2022, regarding provision of livestock unit and indigenous trees to the local women as per agreed performance indicators for GAP, a plan was prepared. The activities of provision of livestock (goats/sheep) to the vulnerable and poor women have been started. Meetings conducted with the females in both river basins. Scrutinized the applications as per selection criteria and prepared SDDRs of Mula river basin and Zhob river basin. The progress of GAP component is shown in Annexure 3.
43. The gender consultations were conducted in the subproject areas and the progress on GAP is placed in the following. A socio-economic survey of women of Siri Toi subproject area for Gender Needs Assessment was conducted in 4th Quarter 2021 to assess the socio-economic situation of women and their role in different decision-making activities at the household level. Structured interviews were conducted randomly with 25 women in which 15 female belong to Killi Ahmed Khel while remaining 10 are from Landi.
44. The social team comprising of Social Assessment and Gender Development Specialist and Community Development Specialist organized One-day workshop on gender sensitization at PMO Office Quetta during the month of May 2022.
45. During the quarter (July-September 2022): 1) a selection criteria for screening of women for provision of livestock was prepared after discussion with the POM regarding policy, budget and area; 2) preparing plan for the capacity building of women staff working in PMO, PIO including agriculture, forest, OFWM and livestock departments to enhance their performance.

4.2.1 Pressing Needs of Women

- During consultations women expressed following pressing needs:
- Supply of clean drinking water and sanitation facilities;
- Provision of electricity in sub-project areas;
- Access roads and public transport facilities;
- Trained lady health visitor;
- Participation of women in income generation activities; and
- Discussed in details on GAP component and their participation.

4.2.2 Findings of Women Response

- Women ensured their full support and they will participate in the grant project by applying to avail the project interventions.
- Capacity building of local health providers are also needed so that women have opportunity to avail better health services.
- Skill enhancement trainings are needed to build their capacity to ensure sustainable earning.
- Awareness sessions are needed to overcome gender discriminations in the area.
- Women community was not ready to share their name for attendance because if they share then interventions must be provided. This will be taken care once advertisement is made in the pilot site and women are asked to submit their applications. Women are behaving little bit in angry mode as they were hardly provided any interventions in the past to enhance their income.
- Training venue should be their own village as their male don't allow to go away alone.
- Some female participants entrusted in hair cutting, embroidery and sewing training.

4.2.3 Concerns of Women

- The water is polluted from animals/livestock on its way. The women fetch drinking water on donkey which is not good for health and the people are suffering from disease like Diarrhea, Malaria, Hepatitis, joint pain, kidney diseases especially kidney stones includes typhoid.
- During the meeting sessions, most of participants revealed their concerns that various NGOs have visited in the past, held several meetings and ensured to work for women empowerment but no outcomes.
- The participants also shared that due to man dominant society, mostly NGOs not willing to work for women empowerment and ignored the women group which also caused the gender discriminations in the areas.
- At the end of meetings, community women ensured that they will participate in the project. The project team also ensured the community women that they will keep close coordination with females and will create opportunities for them during the project activities.
- In most of the area, the women complaint was that they are not allowed in decision making particularly marriage of their daughters, selection of families, dowry and sale & purchase of the properties.

4.3 MEETINGS WITH MALE COMMUNITIES

46. The Social team contacted male communities of Siri Toi subproject during the reporting quarter. Consultations were held with the participants of three killies. Project interventions were discussed in details and questions/concerns were raised from the participants.

4.3.1 Pressing Needs of Male Community of Siri Toi subproject

- Shortage of irrigation water;
- Un-levelled land, difficulty in cultivation;
- Worst condition of access road;
- No Government interest to improve educational facilities;
- Lack of electricity in the area; and
- Lack of health facilities and
- Wishes for Construction of Dam.

5 PREPARATION OF SDDRS OF “LIVELIHOOD AND INCOME GENERATION THROUGH DISTRIBUTION OF GOATS/SHEEP” FOR WOMEN IN MRB AND ZRB SUBPROJECT AREA

47. During the reporting period of October 2022 to December 2022, Social Due Diligence Reports of MRB and ZRB were prepared and submitted. The description of the SDDRs is provided below:

5.1 PREPARATION OF SDDR OF MULA RIVER BASIN (MRB), KHUZDAR

5.1.1 The Project Area

48. The project is located in District Khuzdar. The area selected for the scheme is Karkh Valley Development subproject comprised the killies of Chutta, Nokjo, Wahandri and Khadri. These sites can be accessed from the Khuzdar city through matled road at a distance of 60 km. Private transport is the main source of social mobility. The area is dependent on rain. Most of the crops are sown dependent on rain and at few locations, tube wells are installed due to shallow depth. Solar scheme under BWRDSP is also being launched for the small farmers in this area.

5.1.2 Objectives of the Project

49. The overall objective of the BWRDSP is to support the government in water sector planning, management and investment on water sector infrastructure in selected river basins. The main objectives of the subproject are:

- Employment Generation and Mutton & Wool Production.
- Food Security; and
- Poverty Reduction.

5.2 LIVELIHOOD & INCOME GENERATION THROUGH SHEEP/ GOAT DISTRIBUTION AND ITS SCOPE

50. The scope of the works for this component includes” “Livelihood & Income Generation Through sheep/goats Distribution for Mula River Basin” under the Balochistan Water Resources Development Sector Project (BWRDSP)”, as per survey, design, layout and cost estimates prepared by the Agriculture & Cooperatives department. The subproject

shall be completed by the PIO in association with Livestock and Dairy Development Department, Government of Balochistan. The scope of the subproject is to provide 1 package of 04 Kamori goats to one poor and deserving female selected as per criteria. 69 Nos. of cases were to be selected for the project incentives.

5.2.1 Location of the Subproject

51. The scope of the subproject includes the provision of goats to the deserving and selected females as per criteria of Mula River Basin area under JFPR grant. In Mula River Basin (MRB), District Khuzdar, 69 females were selected as per selection criteria and grant. Before implementation of this proposed selection criteria, a joint visit of all stakeholders including Project Implementation Office (PIO) Officials, BWRDSP Consultants along with Livestock and Dairy Development department was conducted to validate the established criteria, visited area in October 2022. The objective of the joint visit was to make interaction with female applicants, visit their sites/houses to check suitable environment for goats keeping and viability of the criteria at ground in the pilot sites for the selection of female applicants. The summary of field visits is provided below. The photographs of the meetings and consultation are provided in the Annexure 6.
52. The people of the area were pleased to know about the proposed grant. “Livelihood & Income Generation of Females of Kamori goats ” for Mula River Basin” under the Balochistan Water Resources Development Sector Project (BWRDSP)”, will be much beneficial for the local poorer and vulnerable females to boost their economic condition due to project support. They were of the view that after the project support, their income will be increased resultantly, poverty will be reduced. The photographs of few meetings are provided in the Annexure I. The important general objectives of the consultation process were:
- Conducted door-to-door visits of the village/killi where Consultations with women community members were planned. Interviewed 104 female applicants and asked about the given questionnaire and value-added livestock through value chain development at the HH level and 10 % share which is mandatory while providing the grant. Further, discussed the below points:
 - Briefly defined to women community members about livestock production and caring at the HH level.
 - Discussed capacity building of the women community members on livelihood-related training.
 - Explained in detail the purpose of GAP to women community members to understand the role of gender in society.
 - Briefly defined the community to ADB-JFPR project means to eradicate poverty and empower women at the community level. It especially emphasizes engaging females in agri-business.
53. The departmental staff, based on the approved selection criteria, identified the females/ sites fulfilling the eligibility criteria and advised the Consultants to prepare documents and cost estimates for these applicants.
54. According to planned program and project target as per selection criteria and grant, 69 females were to be selected in Mula river basin project area. Due to exhaustive efforts to create awareness and motivation, 104 showed their interest and applied for the

**5th SEMI-ANNUAL SOCIAL SAFEGUARDS INTERNAL MONITORING REPORT
(JULY-DECEMBER 2022)**

incentives. After scrutiny of applications, 69 females were selected who fulfilled the selection criteria. The status of the applications is as below:

Total applications received (Nos.)	Applications dropped/rejected (Nos.)			Final approved applications (Nos.)
	No experience of keeping goats	Applications from the same family	Can't afford 10 % share of total cost	
104	15	10	10	69

55. The final list of 69 cases is provided in Table 7 below:

Table 7: Final Approved List of 69 Women for Livestock Provision in MRB area

56. Thus, this SDDR has been prepared for 69 female applicants as per ADB trust under JFPR grant in the Mula River Basin subproject area, District Khuzdar.

5.2.2 Criteria for selection of deserving females for keeping goats through Project

57. Female applicants eligible for keeping goats through Project must meet the following criteria:

- The applicant should reside in the area of MRB subproject approved for this component.
- The applicant must possess Computerized National Identity Card (CNIC).
- The applicant takes interest in keeping goats but cannot afford to purchase.
- The female applicant will be provided training in livestock sector outside the house.
- The applicant should not have already more than 5 numbers of goats.
- She should not be a defaulter from any Govt/Private department.
- She has not got benefits earlier from any project or NGO.
- She will be in a Contract agreement with Livestock department, PIO or any other authorized female staff to check or inspection the applicant and goats.
- She is agreed to share 10 percent of the total cost of sheep/goats in cash or kind.

- The applicant will agree to look after the sheep/goats provided by the project at least for one year.

5.2.3 Applications and Agreement Contract

58. A sample agreement of Urdu version signed by the applicant verified by the livestock department and approved by the PIO-PMO is provided in the Annexure II. The Contract agreement have been signed individually with all female applicants.

5.2.4 The Sub-Project Components

59. The package comprised total 4 kamori Goats. (01 male and 03 female) to each selected and approved female applicant for MRB area.

5.2.5 LAR Impact

60. The SDDR team has worked closely with the design team with the objective of adjusting the design to avoid or minimize the likely impact. The PIO, Consultants team and Livestock & Dairy Development department ensured that the proposed project does not involve LAR and IPs impacts because 4 kamori goats up to one ear age to be provided by the project will be kept in the private owned courtyard or adjoining the residence and there will be no impact on other asset or property.

5.2.6 Findings of Due Diligence Work

61. Key findings of social safeguards due diligence work are presented below:

5.2.6.1 Involuntary Resettlement (IR) Category

5.2.6.1.1 Land Acquisition

62. As per ADB Safeguard Policy Statement (SPS-2009), the LAR impacts are considered significant if 200 or more persons experience significant impacts that are physically displaced from housing and lose 10% or more of their income-generating resources.
63. The proposed project does not involve LAR impacts because 4 kamori goat up to one year age to be provided by the project will be kept in the private owned courtyard or adjoining the residence and there will be no impact on other asset or property.
64. Will require only 3.5 kanals land owned by the 69 female owners. Only 01 marla (272 sft) land of each female applicant will be required to keep 4 goats in her house yard. The applicant is a sole beneficiary of the scheme provided by the project based on an agreement attached. The 4 goats up to age of one year age will be kept on the applicant's land as per individual agreement signed by her cannot be considered as the voluntary land donation (VLD). This small piece of land will not be utilized for the community. The list of the deserving/vulnerable and approved females is provided in Table 2.
65. The applicant will spare/ provide 01 marla of land for her own interest and benefits. This land will not be considered "donation" as donation means things/property for the welfare of other people.
66. The project is categorized as the IR category C. The IR checklist is given in **Annex-III**.

5.2.6.2 Indigenous Peoples (IP) Category

67. The project component "Livelihood and Income Generation of Females through Provision of sheep/goats" is located in Mula River Basin (MRB), Khuzdar district do

not recognize as IPs. Moreover, subproject intervention does not affect any relocation and migration of the people due to keeping 04 goats on 01 marla of small piece of land. Hence, the subproject is classified as category “C” for indigenous peoples safeguards and therefore, no IP framework or a plan is required for the subproject. The IP checklists are reflected in **Annex-8**.

5.3 PREPARATION OF SDDR OF LIVESTOCK PROVISION FOR ZHOB RIVER BASIN (ZRB), ZHOB

5.3.1 The Project Area

68. The project is located in District Zhob. The area selected for the scheme is Badinzai and Tora Darga including other settlements Shankhai Ghundai, Marofzai, Tatozai, Tora Shah, Salmanzai, Lasizai, Wannaji, and Bob-e-Erabzai. These sites can be accessed from the Zhob city through matled road at a distance of 20-30 km. Private transport is the main source of social mobility. The area is dependent on rain. Most of the crops are sown dependent on rain and at few locations, tube wells are installed due to shallow depth. Solar scheme under BWRDSP is also being launched for the small farmers in this area.

5.3.2 Objectives of the Project

69. The overall objective of the BWRDSP is to support the government in water sector planning, management and investment on water sector infrastructure in selected river basins. The main objectives of the subproject are:

- Employment Generation and Mutton & Wool Production.
- Food Security; and
- Poverty Reduction.

5.3.3 Livelihood & Income Generation through Sheep/ Goat Distribution and its Scope

70. The scope of the works for this component includes” “Livelihood & Income Generation Through sheep/goats Distribution for Zhob River Basin” under the Balochistan Water Resources Development Sector Project (BWRDSP)”, as per survey, design, layout and cost estimates prepared by the Agriculture & Cooperatives department. The subproject shall be completed by the PIO in association with Livestock and Dairy Development Department, Government of Balochistan. The scope of the subproject is to provide 1 package of 10 sheep/goats to one poor and deserving female selected as per criteria. 69 Nos. of cases were to be selected for the project incentives.

5.3.4 Location of the Subproject

71. The scope of the subproject includes the provision of goats to the deserving and selected females as per criteria of Zhob River Basin area under JFPR grant. In Zhob River Basin (ZRB), District Zhob, 69 females were selected as per selection criteria. Before implementation of this proposed selection criteria, a joint visit of all stakeholders including Project Implementation Office (PIO) Officials, BWRDSP Consultants along with Livestock and Dairy Development department was conducted to validate the established criteria from October 2022 to November 2022. The objective of the joint visit was to make interaction with female applicants, visit their sites/houses to check suitable environment for goats keeping and viability of the criteria at ground in the pilot sites for the selection of female applicants. The summary of field visits is provided

**5th SEMI-ANNUAL SOCIAL SAFEGUARDS INTERNAL MONITORING REPORT
(JULY-DECEMBER 2022)**

below. The photographs of the meetings and consultation are provided in the Annexure 6.

72. The people of the area were pleased to know about the proposed grant. “Livelihood & Income Generation of Females Through Goat (Boer)/Sheep (Balochi, Rakhshani and Bibrikh) up to 6-month age” for Zhob River Basin” under the Balochistan Water Resources Development Sector Project (BWRDSP)”, will be much beneficial for the local poorer and vulnerable females to boost their economic condition due to project support. They were of the view that after the project support, their income will be increased resultantly, poverty will be reduced. The photographs of few meetings are provided in the Annexure I. The important general objectives of the consultation process were:

- Conducted door-to-door visits of Village/killi Badenzai and Tora Dargah where FGDs with women community members were planned. Interviewed 132 female applicants and asked about the given questionnaire and value-added livestock through value chain development at the HH level and 10 % share which is mandatory while providing the grant. Further, discussed the below points:
- Briefly defined to women community members about livestock production and caring at the HH level.
- Discussed capacity building of the women community members on livelihood-related training.
- Explained in detail the purpose of GAP to women community members to understand the role of gender in society.
- Briefly defined the community to ADB-JFPR project means to eradicate poverty and empower women at the community level. It especially emphasizes engaging females in agri-business.

73. The departmental staff, based on the approved selection criteria, identified the females/ sites fulfilling the eligibility criteria and advised the Consultants to prepare documents and cost estimates for these applicants.

74. According to planned program and project target as per selection criteria and grant, 69 females were to be selected in Badinzai and Tora Darga of Zhob project area. Due to exhaustive efforts to create awareness and motivation, 132 showed their interest and applied for the incentives. After scrutiny of applications, 69 females were selected who fulfilled the selection criteria. The status of the applications is as below:

Total applications received (Nos.)	Applications dropped/rejected (Nos.)			Final approved applications (Nos.)
	No experience of keeping goats	Applications from the same family	Can't afford 10 % share of total cost	
132	25	20	18	69

75. The approved list of 69 cases of ZRB area is being provided in the Table 8 below:

Table 8: Final Approved List of 69 Females for Livestock Provision in ZRB, Zhob area

76. Thus, this SDDR has been prepared for 69 female applicants as per ADB trust under JFPR grant in the Zhob River Basin subproject area, District Zhob.

5.3.5 Criteria for selection of deserving females for keeping goats through Project

77. Female applicants eligible for keeping goats through Project must meet the following criteria:

- The applicant should reside in the area of Zhob subproject approved for this component.
- The applicant must possess Computerized National Identity Card (CNIC).
- The applicant takes interest in keeping goats but cannot afford to purchase.
- The female applicant will be provided training in livestock sector outside the house.
- The applicant should not have already more than 5 numbers of goats.
- She should not be a defaulter from any Govt/Private department.
- She has not got benefits earlier from any project or NGO.
- She will be in a Contract agreement with Livestock department, PIO or any other authorized female staff to check or inspection the applicant and goats.
- She is agreed to share 10 percent of the total cost of sheep/goats in cash or kind.
- The applicant will agree to look after the sheep/goats provided by the project at least for one year.

5.3.6 Applications and Agreement Contract

78. A sample agreement of Urdu version signed by the applicant verified by the livestock department and approved by the PIO-PMO is provided in the Annexure II. The Contract agreement have been signed individually with all female applicants.

5.3.7 The Sub-Project Components

79. The package comprised total 10 Goat (Boer)/Sheep (Balochi, Rakhshani and Bibrikh) up to 6-month age. (01 male and 09 female) to each selected and approved female applicant for ZRB area.

5.3.8 LAR Impact

80. The SDDR team has worked closely with the design team with the objective of adjusting the design to avoid or minimize the likely impact. The PIO, Consultants team and Livestock & Dairy Development department ensured that the proposed project does not involve LAR and IPs impacts because 10 Goat (Boer)/Sheep (Balochi, Rakhshani and Bibrikh) up to 6-month age to be provided by the project will be kept in the private owned courtyard or adjoining the residence and there will be no impact on other asset or property.

5.3.9 Findings of Due Diligence Work

81. Key findings of social safeguards due diligence work are presented below:

5.3.9.1 Involuntary Resettlement (IR) Category

5.3.9.1.1 Land Acquisition

82. As per ADB Safeguard Policy Statement (SPS-2009), the LAR impacts are considered significant if 200 or more persons experience significant impacts that are physically displaced from housing and lose 10% or more of their income-generating resources.
83. The proposed project does not involve LAR impacts because 10 Goat (Boer)/Sheep (Balochi, Rakhshani and Bibrikh) up to 6-month age to be provided by the project will be kept in the private owned courtyard or adjoining the residence and there will be no impact on other asset or property.
84. Will require only 07 kanals (0.88 acre) land owned by the 69 female owners. Only 02 marla (544 sft) land of each female applicant will be required to keep 10 sheep/ goats in her house yard. The applicant is a sole beneficiary of the scheme provided by the project based on an agreement attached. The 10 Goat (Boer)/Sheep (Balochi, Rakhshani and Bibrikh) up to 6-month age will be kept on the applicant's land as per individual agreement signed by her cannot be considered as the voluntary land donation (VLD). This small piece of land will not be utilized for the community. The list of the deserving/vulnerable and approved females is provided in Table 2.
85. The applicant will spare/ provide 02 marla of land for her own interest and benefits. This land will not be considered "donation" as donation means things/property for the welfare of other people.
86. The project is categorized as the IR category C. The IR checklist is given in **Annexure-7**.

5.3.9.2 Indigenous Peoples (IP) Category

87. The project component "Livelihood and Income Generation of Females through Provision of sheep/goats" is located in Zhob River Basin (ZRB), Zhob district do not recognize as IPs. Moreover, subproject intervention does not affect any relocation and migration of the people due to keeping 10 Goat (Boer)/Sheep (Balochi, Rakhshani and Bibrikh) up to 6-month age on 02 marla of small piece of land. Hence, the subproject is classified as category "C" for indigenous peoples safeguards and therefore, no IP framework or a plan is required for the subproject. The IP checklist are reflected in **Annexure-8**.

5.4 CONSTRUCTION OF SOCIAL STRUCTURES

88. During the field visits, meetings and consultation with the local communities, their demands of washing points/access to water for domestic use, wazu (ablution) place and cattle ghats etc. were recorded and were included in the design. The following facilities shown in Table 9 were provided at different subprojects during the reporting period.

Table 9: Provision of Social Structures/Facilities (Nos.)

S.No	Subproject	Access to water/ washing points		Cattle ghat		Wazu point	
		Provision	Constructed	Provision	Constructed	Provision	Constructed
1	Ahmadzai	1	1	1	1	1	1
2	Karkh Valley Dev, Subproject	-	-	-	-	2	-
3	Kharzan-Hatachi	21	-	-	-	1	-
4	Killi Sardar Akhter	1	-	1	-	1	-
5	Siri Toi Subproject	10	-	7	-	2	-

5.5 CONDUCTING SOCIO-ECONOMIC AND RESETTLEMENT SURVEY OF CHURRI INFILTRATION GALLERY SUBPROJECT, MRB, KHUZDAR

89. During the month of December 2022, the social team of the Consultants conducted Socio-economic and Resettlement survey for the feasibility study. The data is under process that will be a part of the feasibility report of Churri Irrigation Scheme. After land identification survey, the SDDR will be prepared during the next QPR.

5.6 SOCIAL SAFEGUARD COMPLIANCE

90. The construction activities are progress on Ahmadzai subproject, Karkh Valley Development subproject and Kharzan-Hatachi Subproject. The complaint registers were provided to the GRC members including women members to register complaint during construction time.

91. From all sites, no any complaint was received during the reporting period.

Output 1: Irrigation Infrastructure Constructed and Improved				
1.	Ensure women's participation in consultations for need assessment during sub-projects (dams, weirs, watercourses, canals) design and construction	1.1.1 50% of all consultations include at least 30% women participation. 1.1.2 At least 3 women-only consultations conducted (1 consultation for each core subproject). (2016 baseline: Not applicable)	PMO and PIO with the assistance of the Social and Gender Specialist and the field offices in MRB and ZRB.	In 23 killies of 6 subprojects including MRB and ZRB, total 46 community consultations/awareness conducted – out of total 1296 participants, 59 % were women. In 23 killies of 6 subprojects including MRB and ZRB, total 46 community consultations/awareness raising activities conducted – out of total 46 consultations, 23 consultations were conducted with males and the same numbers of consultations were arranged with females.
1.2.	Conduct needs assessment to determine the communities' choices of domestic water supply locations, washing facilities, water collection points, and other like facilities	1.2.1 Women's groups consulted in the needs assessments during subprojects' design and construction. 1.2.2 Needs assessment report reflects inputs from women's groups. 1.2.3 Communities' and women's groups' inputs are considered in the subprojects' designs and contracts.	PMO and PIO with the assistance of the Social and Gender Specialist and the field offices in MRB and ZRB.	Status: 347 females were consulted for their needs assessment. The survey covered the subsections 1.2.1, 1.2.2 and 1.2.3. <ul style="list-style-type: none"> During May 2021, 102 women were consulted regarding their needs assessment from 7 killi of 3 subprojects (MRB). During June 2021, 136 women were consulted regarding their needs assessment from 12 killi of 3 subprojects (MRB). During July 2021, 49 women were consulted regarding their needs assessment from 2 killi of 01 subproject (MRB). During Aug. 2021, 119 women were consulted regarding their needs assessment from 6 killi of 02 subprojects. (ZRB). During the month of June 2022, social team visited 6 villages of Karkh Valley Development Subproject and held meetings with 86 females to re-assess their needs. After consultation, women's group input are considered in the design.

**5th SEMI-ANNUAL SOCIAL SAFEGUARDS INTERNAL MONITORING REPORT
(JULY-DECEMBER 2022)**

Sr. No.	GAP Components	Monitoring Indicators	Responsibility	GAP Status/Remarks
				<ul style="list-style-type: none"> The reports submitted are reflecting their needs assessment.
1.3.	Install facilities in irrigation schemes to enable women's safe and improved access to water for domestic use.	1.3.1 At least 30% of irrigation schemes targeted for construction/ rehabilitation have installed facilities for women's safe and improved access to water for domestic use	PMO and PIO with the assistance of the Social and Gender Specialist and the field offices in MRB and ZRB	<p>Completed: Their demand and necessity have been incorporated in the design for women's improved access to water for domestic use.</p> <p>The Social Assessment and Gender Development Specialist discussed with the CRE at Quetta and REs at sites to consider these social facilities on priority basis during construction.</p>
1.4.	Document impact of increased access to water for domestic use on women's time poverty.	1.4.1 Impact study report includes quantitative and qualitative results of improved access to water for domestic use on women's time poverty.	PMO and PIO with the assistance of the Social and Gender Specialist and the field offices in MRB and ZRB.	Status: These facilities are not yet completed. At later stage, the NGO will conduct impact study to assess the benefits to the women.
1.5	Ensure that all eligible and entitled women are aware of and get their rightful compensation as vulnerable affected people.	<p>1.5.1 All affected women given orientation on compensations and process of claiming compensation</p> <p>1.5.2 All entitled affected women provided with support to facilitate their opening of bank accounts to receive compensation</p>	PMO and PIO with the assistance of the Social Assessment and Gender Development Specialist and the field offices in MRB and ZRB.	In all subprojects. Affected women were not found regarding land, structures, tree and crop. The revenue record also indicated that land of women was not under impact. So there is no issue of bank account opening to receive compensation.
1.6	Ensure women's participation in Grievance Redressal Committees (GRCs).	<p>1.6.1 At least 25% of all GRCs are women-only GRCs</p> <p>1.6.2 For areas with no women-only GRCs, separate GRC meetings are held for women</p>	Consultants	<p>The local culture does not allow to work independently by the women in irrigation system or committee etc. However, efforts were made for their participation in each GRC as a member.</p> <p>In all rehabilitation schemes, women participation was ensured and documented in QPR and Semiannual reports. Women participation in all GRCs was 33 %.</p>
Output 2: Command area and watershed protection established and/or rehabilitated				
2.1	Conduct awareness raising sessions in ZRB and MRB communities on safe drinking water, water borne diseases and control, and	2.1.1 Two (2) awareness sessions in each subproject area (with 2 females-only sessions) conducted on health, hygiene, and safe	PMO and PIO with the assistance of the Social Assessment and Gender Development Specialist and the	<p>Status: Basic awareness created by the Consultants social team.</p> <p>Implementation: After NGO on board, the professional awareness and training regarding health, hygiene, safe</p>
